Managua, Nicaragua

Relevant Experience

Washington and Lee University

August 2025 - Present

Web Content Specialist

Lexington, VA

- Craft and optimize dynamic web content using CMS and CSS, enhancing site accessibility and UX
- Collaborate with teams to implement polished, responsive digital designs that boost engagement and SEO

Mapfre | Webster, MA

June 2026 - August 2026

IT Common Capabilities Engineering Intern

Webster, MA

- Refactored enterprise RPA automations from UiPath to AWS-based API services using Python, improving scalability and maintainability of insurance workflows.
- Developed and enhanced the First Notice of Loss (FNOL) automation by implementing business/system exception handling, business-ready claim summary outputs, and test suites with coverage.
- Built and deployed cloud infrastructure using AWS CDK, collaborated through GitHub Pull Requests, Jenkins CI/CD pipelines, and Agile ceremonies while working with Guidewire ClaimCenter integrations.

Corporación Multi Inversiones (CMI)

June 2025 - August 2025

IT Intern

Dallas, TX

- Engineered automated PowerShell scripts for silent software deployment across 1000+ endpoints, eliminating downtime and boosting efficiency by 30%
- Revived and repurposed decommissioned servers, generating an estimated \$50K+ in hardware savings
- Deployed and configured laptops, AV systems, and MDM devices for new hires, enabling same-day operational readiness

Washington and Lee University

June 2024 - September 2024

Summer Research Assistant / Research Intern

Lexington, VA

- Conducted hydrogeochemical research on arsenic contamination in the Ganges River, using Python and PHREEQC to analyze groundwater samples and model arsenic mobilization processes
- Developed a computational approach to optimize data storage and analysis, collaborating with a research team to interpret findings, troubleshoot data inconsistencies, and enhanced decision-making and teamwork skills
- Presented research findings at the Geological Society of America (GSA)
